Summary

Technical founder who works directly with clients to turn uncertain workflows into software and operate it after launch. Build OpenAI API integrations, tenant-aware TypeScript services, and AI workflows with structured outputs and explicit review steps.

Skills

- AI: model integration
- Development: TypeScript, JavaScript, React, Next.js
- Data: PostgreSQL

Professional Experience

Founder / Product Engineer / Systems Lead

Technomancy IT LLC

Present

- Build client-facing products and integrate OpenAI models into workflows with structured outputs and explicit review steps.
- Carry projects from an initial client problem through UI, APIs, tenant-aware data services, deployment and support.

Senior Systems Engineer / Datacenter Architect

Front Range Internet Inc.

2015 - 2020

- Built NOC and hosting customer tools, led engineering escalations and modernized selected workloads with Docker and Kubernetes.

Systems / Software Engineer

Office Evolution

2014 - 2015

- Built shared CRM, onboarding and provisioning tools that made handoffs between departments explicit.

Network & Systems Engineer

PlumChoice / Everon

2012 - 2014

- Built diagnostic tooling for recurring customer issues and worked directly with business owners and end users.

Infrastructure and Systems Focal

IBM

2010 - 2012

- Built an internal backup tool used to reduce licensing costs; automated audit and backup tasks and maintained virtualized test environments.

Selected Projects

NuPrice | Marketplace repricing

Long-term client engagement

2019 - 2021

- Built and operated pricing rules, marketplace ingestion, monitoring, billing and customer support for a repricing SaaS.

ProofMark | Verifiable document workflows

Completed client contribution

- Designed a signing workflow with explicit identity, permission, verification and audit states across the UI and APIs.

Education

Front Range Community College

Computer Science coursework

2011 - 2013
